

# CONTROL

<https://solutions.plassonlivestock.com/system/control/>

## OVERVIEW

Plasson offers a wide range of House controllers, designed to achieve ideal conditions for improving bird performance by enabling complete control and management of all functions and systems of the chicken house.

Plasson's variety of controllers, allows us to offer growers, a tailor-made solution, that is based on the following principals:

- Local Climate conditions
- Growth critical inputs Humidity, Temperature, CO<sup>2</sup>, Ammonia, Static pressure
- User interface (Touch screen / Keypad)
- Growth dedicated software (Broilers, Breeders, Layers, etc.)
- Number of required operations (Relays)
- Communication abilities (Remote access)
- Additional features (WOD Pro, Variable speed fans, Flush control, Feed weighing, etc.)
